JIKA offers ceramic solutions geared towards the needs of businesses. One of them is Golem urinal with an external water inlet, which is popular mainly for its practical and simple design. You can connect this urinal to a horizontal or vertical siphon, and an inlet fitting with a pressure valve, a ratchet or a fitting suitable for sensor control can be used for flushing. We provide an extended 10-year warranty on the urinal. Assembly instructions can be found in the download documents. We recommend using a concealed module for urinals.
