Total water consumption:

0.412 m3 world eq.

Product Description:

OX-ON Cut Supreme 9604 is a durable, cut-resistant (Cut Level F) glove for those who need the highest-level protection (Cut Level F). These gloves are indispensable for occupational exposure to severe cut-injury risk – whether for glazing work, in heavy industry, in waste management or other environments involving sharp objects. The work gloves are finger-dipped knit gloves made of polyester with spandex for superb dexterity and superior fit. The palm and fingers are coated with nitrile, which provides a rough surface for a precise and secure grip. Cut Supreme 9604 also feature reinforced protection in the vulnerable area between the thumb and index finger. These gloves also feature Touch for ease of screen operation. Cut Supreme 9604 reduce the risk of cutting injury because the gloves contain cut-resistant fibers. This increases safety if working with sharp objects. With these Cut gloves you benefit from significantly more durable hand protection than provided by traditional flex gloves on the market.
