

## Declaration of Formaldehyde

Formaldehyde emission of CE-marked WISA<sup>®</sup>-Plywood is very low and measured values are below even the tightest national requirements.

When determined according to EN ISO 12460 - 3 (gas analysis method) the formaldehyde emission of uncoated exterior is under 0,4 mg/(m<sup>2</sup> x h). That is significantly lower comparing to requirement in E1 class 3,5 mg/(m<sup>2</sup> x h).

By using type testing method EN 717-1 (chamber method) formaldehyde emission of WISA<sup>®</sup>-Plywood is under 0,02 mg/m<sup>3</sup>. E1 limit for method EN 717-1 is 0,124 mg/m<sup>3</sup>.
