6

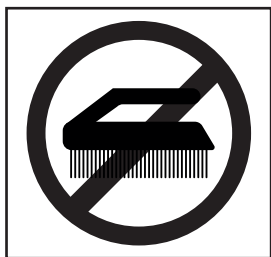

Rengjør jevnlig dysene på dusjhodet for å forhindre at kalk blokkerer dysene og forårsaker sprekker i dusjhodet.

Bruk ikke sure eller alkaliske rengjøringsmidler som alkohol, desinfeksjonsmidler, fortynningsmidler osv. til å rengjøre produktet, for å unngå misfarging og skade. Hvis rengjøringsmidler fortsatt brukes på skadede overflater, kan det føre til ytterligere skade på produktets overflate.

Bruk ikke grove rengjøringsverktøy til å rengjøre produktets overflate, som stålull, fibersvamp eller børster med slipefunksjon, da disse vil ripe opp produktets overflate. Bruk en myk bomullsklut til rengjøring.
