

LED-Lamp

Thank you for choosing this product.

Read this manual carefully before usage and retain for future reference.

NOTE:

The sensor range is 2-3 meters in the front, and 1-2 meters at the sides.

The sensor effect is related to the temperature and movement speed.

Sensor must not be covered or dirty and should be cleaned.

It must be kept away from dampness, too high or too low temperature and air vent.

The lamp should be fully charged for optimal operation.

The lamp may only be used indoors!
